The safety of your cargo
- our commitment

ISO 9001
CERTIFIED

Nørresundby, December 2007

Concerning: Approvals & environment.

Approvals regarding packaging used for foodstuff.

- All items/components which form part of the airbag, are approved for use in packaging, which is used for foodstuff according to:
 - FDA (American Food and Drug Administration)
 - BGA (Bundesgesundheitsamt)
 - EU Directives 1935/2004/EF, 97/48/EF, 2007/19/EF, 2002/72/EF

Environment:

- None of the raw materials used have a negative impact on the environment

Heavy metals:

- Bates Cargo-Pak airbags are in compliance with the EU directive 2005/20/EF (detailed report can be showed upon request)

Disposal:

- All raw material can be recycled.
When burned, the materials are transformed into CO₂, water, biomass (ashes) and heat.
If the valve is separated from the film, the film can be reused for new film.
None of the materials used have a negative impact on the environment.

Pallets:

- All our pallets conform to the standard ISPM 15
All our pallets have the PPC stamp marked/engraved to confirm.
If required a special certificate can be made with the shipments.

Yours sincerely
Bates Cargo-Pak
